

Adult/Pediatric Gait and Hip Management Orthotic Intervention Considerations

This program emphasizes the closed Chain concepts of gait and applies those functional concepts to Orthotic design. It integrates Biomechanics, proprioception, and muscle function with orthotic design to expand the possibilities for enhanced gait outcomes.

This is the part two of the gait course given last year.

(*Last years attendance is not required*).

4 SCAPTA pre-approved CEU's!

Speakers:

Josh Ahlstrom CPO

Alexander Lyons, CPO
